

D'Arcy Webber

EXPERIENCE

Quantifish Limited, Tauranga — *Director*

MARCH 2012 - PRESENT

I began Quantifish in 2012 to provide quantitative fisheries science consulting services. I registered the company Quantifish Ltd in 2017. I have successfully completed contracts for the Ministry for Primary Industries (MPI), the National Oceanic and Atmospheric Administration (NOAA), the National Institute for Water and Atmospheric Research (NIWA), the Commission for the Conservation of Southern Bluefin Tuna (CCSBT), and more. Contracts have included several rock lobster stock assessments with management procedure evaluations, development of length structured stock assessment models, seabird and marine mammal risk assessments (including the Hector's and Maui dolphin threat management plan), reviewing shellfish Working Groups, supporting the scientific process for CCSBT as the independent consultant, and more.

University of Washington, Seattle — *Postdoctoral Fellow*

FEBRUARY 2016 - JUNE 2017

The development of assessment models for Alaskan Crab stocks. These assessments and associated code are freely available online on GitHub (<https://github.com/seacode/gmacs>).

Ministry for Primary Industries (MPI), Wellington — *Science Officer*

JANUARY 2011 - FEBRUARY 2012

At MPI I provided technical support to further the development of advice on sustainability measures and worked to refine the overall fisheries management framework. I helped produce the annual plenary documents, and supported the annual fisheries science working group process.

EDUCATION

Victoria University of Wellington, Wellington — *PhD Statistics*

2012 - 2015

Thesis: Complexity in Fisheries Stock Assessment. My thesis includes the development of age-structured state-space stock assessment models, the development of new methods for analysing PSAT data, and research on

SUMMARY

I have a passion for the ocean, especially fish. If I am not out fishing, you will likely find me talking about fish, or modelling fish populations. I have a unique set of skills with a background in biology, ecology, statistics, and modelling.

KEY SKILLS

Highly motivated, focused and willing to learn. Capable and keen to learn complex analytical skills and can do so quickly and independently

Can work well independently or as part of a team and possess good leadership skills

Excellent project management, and written and oral communication skills

Ninja programming skills, particularly R, C++, Stan, ADMB, LaTeX, Rmd, and more

A Bayesian inference wizard

Bayesian emulation and Bayesian inference.

Canterbury University, Christchurch — MSc with First Class Honours in Ecology

2008 - 2010

Thesis: Demography and Population Projections of the invasive tunicate *Styela clava* in Southern New Zealand.

Canterbury University, Christchurch — BSc Biological Sciences

2005 - 2007

SCHOLARSHIPS

Ministry of Fisheries
Postgraduate Scholarship in
Quantitative Fisheries
Science 2012–2014

Victoria Doctoral Scholarship
from Victoria University of
Wellington 2012–2014

Bikerton-Widdowson
Scholarship for Academic
Excellence from Hagley
Community College
2005–2007

AWARDS

New Zealand Statistical
Association prize for top
student oral presentation
2012

Ministry of Fisheries Prize for
Student Oral Paper Making
the Best Use of Quantitative
Methodology, New Zealand
Marine Sciences Society
Conference 2010, 2012 and
2014

PROFESSIONAL AFFILIATIONS

Member of the following
Ministry for Primary
Industries Working Groups:
Antarctic, Aquatic
Environment, Deepwater,
Rock Lobster, Stock
Assessment Methods
